

RESOLUTIONS TO BECOME A CLIMATE CHAMPION!

1 REDUCE MEAT CONSUMPTION!

Meat producing industries are the 2nd largest greenhouse gas emitters, after oil industries!

2 SWITCH OFF THE LIGHTS!

10%-15% of electricity consumed in homes is used by electrical appliances in standby mode!

3 DRIVE LESS!

Try walking for shorter distances. It is healthy & the planet benefits too! 75% of carbon monoxide emissions comes from automobiles!

4 MAKE USE OF ENERGY SAVING LIGHT BULBS!

Compact Fluorescent Lights (CFLs) use 50% - 80% less energy than incandescents!

5 BUY LOCAL PRODUCE

- More accessible
- Fresher produce
- Less distance travelled, reduced carbon footprint

6 UNPLUG DEVICES WHEN NOT IN USE!

Devices that are "off" or in standby mode can use up to the equivalent of 50 large power plants' worth of electricity each year

7 RECYCLE & REUSE!

Recycling reduces greenhouse gas emissions that contribute to global climate change.
Buy reusable over disposable items.
Eg: Wooden or metal straws over plastic ones!

8 REFUSE OR RECYCLE!

Refuse if not recyclable!
Recycling puts waste materials to good use, helps the economy, creates jobs & manufactures new products!

9 TRAVEL SUSTAINABLY!

Reduce air travel, use public transport, say no to plastic & support the local economy - buy locally.

10 SAVE WATER!

Turn off the water tap while lathering! Keep a mirror note, have everything you need on hand & take 5-minute showers!
